

Project LF2U Memo

Email: lxiong3@hawk.iit.edu

Github: <https://github.com/Lxiong3>

i) This project requires a lot of work and there are multiple difficulties I went through the process developing the program. The hardest part for me is to learn how to use xml from the zero foundation.

ii) The unit tests are separately written in the file "test" which locates in file "main"

iii) this whole project could be tested by publish lf2u-1.0-SNAPSHOT.war(the makefile) on tomcat then run.

iv) appreciate all the question solvings by prof and TA during this hard development of work.
